Attorney's Docket No.: 02894-754US1 / 06796-

Amendments to the Specification:

Please replace the original specification with the enclosed substitute specification. A copy of the substitute specification, showing changes is enclosed.

Please delete previous abstract and add the following new abstract:

An electric drive unit for generating an oscillating movement, having a stator, a rotor, a torsion element and a tuning element. The tuning element acts upon the torsion element and serves to mechanically tune the resonant frequency of the drive unit.
